RE: Manson Van B. Jennings

TO WHOM IT MAY CONCERN:

Manson Jennings has been under my care since 1973.

He was examined today and found to have significant hypertension (high blood pressure). He indicates to me that he has been under undo stress in his job. Because of this, as part of his treatment of ~~his~~ hypertension I have advised him to take sick leave until approximately April 15, 1981. By that time I will have re-evaluated the situation and will be able to determine whether he can or cannot return to work.

Sincerely,

  
John A. Godley, M.D.
