Dear Dallas:

In 1988, The Board of Trustees of the Connecticut State University approved by Board Resolution BR #88-50 the establishment of a Center for Learning and Teaching on the Eastern campus.

Eastern sought the establishment of this center because of its long standing commitment to improving college learning and teaching, and because of its emphasis on undergraduate, liberal-arts oriented curriculum. However, due to financial considerations, the Center did not become operational.

Furthermore, because of your generosity, Eastern has become the home of the Center for Educational Excellence, which has many of the same goals and objectives as those of the Center for Learning and Teaching. The Center for Educational Excellence has had four years of successful programs, and there is every reason to believe that it will have an even more successful future.

Eastern has no future plans for the Center for Learning and Teaching, and is thus requesting its elimination.

Sincerely,

David G. Carter
President
